Work experience

Software Engineering Intern
Advanced Elastomer Technologies
June 2025 - Current Eugene, Oregon
- Setup product database and CRUD operations
- Created 3d graphs to visualize data
- Made a calculator that will create a list of theoretical products based on customer specifications
- Used machine learning to predict product performance
- Learned a wide range of problem solving skills

Mobile Sales Representative
Metro By T-Mobile
July 2024 - January 2025 Corvallis, Oregon
- Worked full time over summer and part time during undergrad
- Became an expert at interacting with Android and Apple operating systems
- Trained in sales and verbally advertising new deals for customers to increase revenue

---

Projects

Targeted Social Media Platform (Undergrad Capstone Project)
Collaborated with five others to make a short form content website. My role was to manage the database backend using Supabase, SQL, and Youtube's unlisted feature

Treasure Hunt Mobile Application (Course Project)
Fully implemented a treasure hunt app for android that uses the user's location to determine if the clues / treasure is found
